

# NEW DESIGN S.M.D. REWORK STATION

Models : 857 A / 857 DA ESD

**MODEL 857 DA WITH 3 DIGITS L.E.D., DISPLAY (for Temp.)**

**MODEL 857 A W/o THE L.E.D., DISPLAY**

1. Uses **DC FAN IMPORTED FROM JAPAN**, soft rotary air, air volume continuously adjustable.
2. Suitable for various applications, such as de-soldering shielding cases, tail sockets, plastic components and so on.
3. Sensitive inductor inside the handle, starts working while picking the handle up from Handle Holder and stops working after placing it back.
4. Temperature stable and accurate and not influenced by the air volume. Easy for de-soldering chips.
